CMMI DEV / 3™

CAPABILITIES

IT MANAGEMENT. Complete IT Service Management solutions with continuous improvement for efficiencies and an optimal end-user experience for more than 10,000 direct end users and 100,000 indirect users globally — highly virtualized environments; from Cloud to desktop; from Civilian health and scientific systems, to classified Defense intelligence global grid systems.

CYBERSECURITY. Protect, Detect, Defend – GRSi delivers full spectrum cyber security support across the DoD, Civilian and Healthcare markets, including hardening, resilience, ISSO support, DIACAP/RMF, crypto, and COOP.

SOFTWARE DEVELOPMENT. GRSi brings innovation with compliance and agility with control. Our CMMI/dev-ML3 appraised processes coupled with our Agile best-practices are proven in organizations at the enterprise level for tens of thousands of users.

LOGISTICS LIFECYCLE MANAGEMENT. Full cradle to grave logistics support services encompasses Army medical and Naval intelligence systems deployed worldwide, as well as scientific and IT systems and peripherals for Federal Intelligence, Healthcare and commercial organizations.

SCIENTIFIC & MISSION SUPPORT. We provide advanced scientific, engineering and research and development support for military, scientific, healthcare and aerospace missions.
